AZACH

RECONSTRUCTION INTO REFINEMENT

www.azach.ng

MODERN FASHION, MADE FROM WHAT ALREADY EXISTS.

AZACH is a circular fashion brand creating contemporary pieces through reconstruction, rework and considered design. We bring existing and deadstock materials together to create refined, wearable pieces designed to move through more than one life.

RECONSTRUCTION INTO REFINEMENT

We don't always become something new by starting over. Sometimes, we build from what we already have.

Reconstructed Into Refinement brings old and deadstock denim together, transforming their differences into subtle, contemporary pieces made for everyday wear.

The idea extends beyond the garment. We reconstruct our lives in much the same way, carrying forward memories, lessons, relationships and resources from where we've been to create what comes next.

What came before doesn't have to be left behind. It can become part of something better.

This is our approach to design: see possibility, use what exists, and refine it into something new.
